CERTIFICATION PROGRAM

LEVEL 1 // ESSENTIAL TELTONIKA NETWORKS TECHNICAL TRAINING

Over the years of product creation and development, we figured that a device is worth as much as the capacity to use it well. By popular demand from our clients, we are launching a first-ever Level 1 Technical Training Program to help you use our products and systems efficiently in order to reach the best possible results.

SPEAKER:

ALIAKSANDR KHOLALAU
Networking and IoT Engineer

Over three years of experience with Teltonika Networks devices and services, such as MODBUS, MQTT, MOBILE, VPN and others.

THE THINGS YOU WILL COVER:

/ During this training, you will get in-depth knowledge about Teltonika Networks products and their specifications.

/ You will analyze specific topologies of real-life application scenarios and acquire the know-how to select the most suitable product for a particular solution.

/ You will also get a first-hand RMS and RutOS experience and learn why Teltonika Networks products have different certificates.

/ Furthermore, you will learn how to use our product codes and how simple it is to choose a suitable device for your solution.

/ By the end of the training, you will be capable of identifying various technical issues and resolving them quickly and efficiently

AGENDA:
