TELTONIKA | Networks

CERTIFICATION PROGRAM

LEVEL 2 // ESSENTIAL TELTONIKA NETWORKS TECHNICAL TRAINING

A follow-up of Essential Level 1 Technical Training that covers Teltonika Networks device configurations in more depth.

SPEAKER:

ALIAKSANDR KHOLALAU

Networking and IoT Engineer

Over three years of experience with Teltonika Networks devices and services, such as MODBUS, MQTT, MOBILE, VPN and others.

THE THINGS YOU WILL COVER:

/ During this training, we will follow up on the Essential Level 1 Teltonika Networks Technical Training.

/ We will introduce you to the theory of leading wireless communication technologies.

/ We will show you how easy it is to make configurations on our operating system – RutOS, maintaining the core focus on security, reliability, and ease of use.

/ You will learn how various RutOS features can enhance your successful business operations.

/ This training is followed by an exam that leads to a Level 2 Technical Certificate.
